COFORGE

Fresher Campus Hiring | Technical Graduate Roles | India
Website: careers.coforge.com | Hiring queries: campus@coforge.com

Job Description

Coforge conducts campus hiring for fresh graduates across technology roles. Based on the candidate's skills and business requirements, selected graduates may contribute to software development, application engineering, testing, maintenance, and technology-enabled client solutions. The exact designation and project allocation are determined by the specific campus hiring drive.

B. Academic Eligibility Criteria

Criteria	Official eligibility stated by Coforge
Minimum CGPA / Graduation	**60% or equivalent** in the graduate degree for B.E./B.Tech applicants.
Class 10th Marks	**Minimum 60%**.
Class 12th Marks	**Minimum 60%**.
Eligible degrees / branches	B.Tech / B.E. applicants from Computer Science (CSE), Electronics & Communication (ECE), and Information Technology (IT) streams.
Backlogs	No current backlogs.

C. Technical Skills Criteria

The campus hiring page describes technical assessments but does not prescribe one universal technology stack for all openings. Preparation should cover:
• Programming fundamentals in C, C++, Java, or Python.
• Data structures, algorithms, OOP, and problem-solving.
• DBMS / SQL, operating systems, and computer networks.
• Basic software development, debugging, and testing concepts.
These are preparation recommendations, not additional official eligibility conditions.

D. Work & Internship Experience Criteria

The page is for fresher campus hiring. Prior full-time experience is not stated as a requirement. Internships, academic work, hackathons, and practical coding experience may help demonstrate skills.

E. Project Criteria

No mandatory project requirement is specified on the campus hiring page. For interview preparation, be ready to explain one technical project, including its objective, architecture, tools, your contribution, testing, and outcome.

Important: The three academic cutoffs above are published on Coforge's official fresher page for B.Tech / B.E. hiring. The exact job title, batch, branch mapping, and drive-specific conditions may vary by campus notification. The 55% criterion shown on the same page applies to a separate Non-B.Tech Service Desk role and is not used in this technical-role profile.
