Skills Required (suggested for Java Full Stack Engineer Trainee)

- **Java & OOP:** the role is Java-focused (from JD); expect core Java, object-oriented concepts, collections, exception handling and multithreading basics.
- **Back end:** Spring / Spring Boot, building REST APIs, Hibernate / JPA basics.
- **Front end:** HTML, CSS and JavaScript, plus a framework such as Angular or React.
- **Databases:** DBMS concepts, SQL queries, and working with MySQL or Oracle.
- **Tools:** Git, Maven, and a Java IDE such as IntelliJ or Eclipse.
- **CS fundamentals & problem solving:** data structures and algorithms, OS and networking basics, aptitude and logical reasoning for the common assessment (from JD).
- **Soft skills:** communication for the interviews (from JD), teamwork, and willingness to learn quickly during training.
- **Higher hiring categories:** the Momentum (₹6 LPA) and Polaris (₹10 LPA) categories typically expect stronger coding and problem-solving skills.

Items marked (from JD) come from the original JD text. The other items are general skills typically expected for this kind of role and are not part of the official JD.
