MAVENTIC

Campus Registration | Software Developer

Job Title Software Developer	**Location** Bangalore	**Joining** Immediate
Work Mode Work From Office	**Eligible Courses** B.Tech (All Branches), MCA, BCA	**Passing Batch** 2027

Eligibility Criteria

- B.Tech (all branches), MCA, and BCA — 2027 pass-outs.
- Minimum 7.5 CGPA for all branches / eligible courses, as stated in the campus notice.
- Good communication skills, strong logical ability, and the ability to write programs in any programming language.
- Basic programming experience.

Qualification & Skills Required

- Basic knowledge of C, C++, Java, HTML5, and JavaScript.
- Knowledge of databases and operating systems.
- Ability to understand requirements and write programs.

Skills to Prepare for This Role

Note: The following is a preparation-oriented skill checklist based on the job description. It expands the stated requirements into practical topics; it is not a claim that every item is a separate mandatory eligibility condition.

- **Programming:** fundamentals in at least one language (C, C++, or Java), variables, data types, operators, conditionals, loops, functions, arrays, strings, and basic input/output.
- **Problem-solving:** logical reasoning, breaking problems into steps, debugging, and basic data structures such as arrays, strings, stacks, queues, and linked lists.
- **Object-oriented programming:** classes, objects, encapsulation, inheritance, polymorphism, and abstraction (especially useful when preparing with Java or C++).
- **Web basics:** HTML5 structure, common tags, forms, CSS fundamentals, JavaScript variables, functions, events, and DOM basics.
- **Database fundamentals:** tables, rows, primary/foreign keys, basic SQL queries (SELECT, INSERT, UPDATE, DELETE), filtering, joins, and basic normalization concepts.
- **Operating systems:** processes vs. threads, memory basics, files, and basic command-line usage.
- **Software development practices:** readable and maintainable code, unit testing, system testing, test cases, version-control basics (Git), and clear technical communication.

Role & Expectations

- Work on large-scale projects and products for leading organizations across multiple countries.
- Write scalable, robust, secure, and high-quality programs.
- Show interest in continuous learning.

Responsibilities

- Assist development heads and leads with software design and coding.
- Learn and improve coding skills; write and maintain code.
- Provide module backups/support for BOL, UI, ADM, Account Console, Mobile, and Automation.

- Respond to requests from the development team.
- Write reports.
- Conduct unit and system tests.

Compensation & Service Agreement

Training stipend	INR 21,500 per month (including PF & ESI deduction)
Blue Band CTC	INR 7,00,000 annually: INR 6,00,000 fixed + INR 1,00,000 variable
Green Band CTC	INR 4,50,000 annually
Service agreement	Minimum association period: training plus 2 years of employment after training, with Procify.
Training period	6 months or until completion of your graduation course, whichever is higher.

Interview Process

- First round: Coding test
- Second round: Coding test
- Short technical interview
- Final technical interview
- HR round

Important Note — Immediate Joining

This opportunity requires immediate joining. Selected candidates are expected to join without delay. The company will provide leave for semester examinations as per its policy. Only students willing to join immediately should apply.

Registration
