# YARDI SOFTWARE

Software Engineer Trainee (SQL) | Fresher | Pune, India | 2026 Batch
Website: yardi.com | Recruitment drive contact: VibrantMinds Technologies (drive organizer)

## Job Description

Yardi Software is recruiting fresh graduates for the Software Engineer Trainee (SQL) role. The role involves developing and maintaining client-specific software solutions, writing SQL queries and stored procedures, preparing reporting scripts, and supporting application troubleshooting. The trainee may also help analyze product issues, optimize database queries, and maintain code changes using the organization's source-control processes.

## B. Academic Eligibility Criteria

| Criteria | Drive eligibility |
|---|---|
| Minimum Graduation CGPA / Marks | **60% or equivalent** in graduation / post-graduation, as applicable. |
| Class 10th Marks | **Minimum 60%**. |
| Class 12th Marks | **Minimum 60%**. |
| Eligible qualification | B.E./B.Tech / MCA / MCS / M.Sc. in Computer Science or Information Technology. |
| Graduation batch | **2026 pass-out batch only** for the listed drive. |
| Backlogs | No active backlogs is stated as a recommended screening condition in the listed drive details; confirm the final rule with the organizer. |

## C. Technical Skills Criteria

- Strong SQL fundamentals, including writing queries and stored procedures.
- Understanding of relational databases, joins, indexing, and query optimization.
- Programming fundamentals and logical problem-solving.
- Ability to analyze application issues and support debugging / troubleshooting.
- Familiarity with source-control tools and software development processes.
- Clear communication and analytical skills.

## D. Work & Internship Experience Criteria

The listed opening is for freshers; prior full-time experience is not required in the drive description. Relevant internships, database coursework, SQL practice, and academic projects may strengthen an application.

## E. Project Criteria

Prepare a database-driven project demonstrating SQL queries, table relationships, joins, stored procedures, reporting, and basic performance optimization. Be ready to explain the schema, queries, your contribution, testing, and how you resolved data or performance issues. This is interview preparation guidance, not a separately stated mandatory project condition.

**Source / verification note:** This role and the 60% academic criteria are from a 2026 Yardi Software India campus-drive listing published by VibrantMinds Technologies, the recruitment-drive organizer. This is not presented as a direct Yardi careers-page posting. The listed registration deadline was 6 October 2026; check with the organizer whether applications are still open before applying.
