SUMMARY

CSE (AI & ML) student with strong foundations in machine learning, computer vision, cloud computing, and full-stack development. **Qualified GATE 2026 (DA) with score 466**. Experienced in building AI-driven systems and blockchain-based applications, including computer vision models, decentralized platforms, and cloud technologies. Solved 500+ DSA problems. Interested in Software Development, Machine Learning, Cloud Computing, and AI-focused roles.

EDUCATION

Year	Degree	Institute	Score
2027	B.Tech CSE (AI & ML)	Lakshmi Narain College of Technology	8.68 CGPA
2023	XII (Mathematics & Computer Science)	Kendriya Vidyalaya N.K.J	95.4%
2021	X (General Curriculum)	Kendriya Vidyalaya N.K.J	96.2%

SKILLS

Languages: C++, Java, Python, JavaScript, SQL
AI/ML: PyTorch, TensorFlow, Scikit-learn, OpenCV, NLP, Computer Vision, NumPy, Pandas
Backend: Spring Boot, REST APIs, Node.js, Express.js
Frontend: React.js
Cloud & Tools: AWS, Azure, GCP, Git, Docker, Postman, Colab
Databases: MySQL, MongoDB

PROJECTS

AppletHive — Decentralized Web3 Applet Marketplace

- Developed a decentralized marketplace for discovering and executing blockchain-based applets.
- Implemented wallet authentication, secure on-chain transactions, and scalable backend APIs.
- Built a responsive React-based interface for seamless Web3 user experience.

AI Architect — Multi-Agent Code Review Platform

- Built an AI-powered code review platform using LangGraph, FastAPI, and Next.js for automated repository analysis.
- Implemented hybrid RAG with Tree-sitter, ChromaDB, and BM25 for context-aware code retrieval.
- Developed AI agents for security, performance, and maintainability analysis, generating structured review reports.

EXPERIENCE

AI Intern — Acmegrade × Mood Indigo, IIT Bombay Feb 2024 – Apr 2024

- Worked on real-world datasets to develop and evaluate machine learning models.
- Applied preprocessing, feature engineering, and model optimization techniques.
- Gained exposure to end-to-end ML pipeline including training, evaluation, and deployment concepts.

ServiceNow System Administrator Virtual Intern Apr 2026

- Completed hands-on training in ServiceNow Administration, Workflow Automation, Reporting, and Agentic AI concepts.
- Worked with Flow Designer, Automated Test Framework (ATF), and ServiceNow platform fundamentals.
- Prepared for ServiceNow Certified System Administrator (CSA) certification track.

ACHIEVEMENTS

- **Qualified GATE 2026 (Data Science & AI)**
  Score: 466; demonstrated strong proficiency in DSA, probability, machine learning, and analytical reasoning.
- **Runner-Up — East India Blockchain Summit (IIT Kharagpur)**
  Developed **Wi-Chain**, a decentralized Web3 marketplace enabling secure and scalable execution of cross-platform applets.
- **Runner-Up — CII Young Indians IDS 4.0**
  Recognized for innovative problem-solving and technology-driven solution development.
- **FutureSkills Prime Certifications (NASSCOM)**
  Achieved Gold Category in Artificial Intelligence & Machine Learning (96%) and Cloud Computing Engineering (Azure/AWS) (100%).
- Solved **500+ DSA problems** across coding platforms.

CERTIFICATIONS

- NVIDIA — Introduction to Transformer-Based Natural Language Processing (2025)
- FutureSkills Prime (NASSCOM) — Certificate Program in Artificial Intelligence & Machine Learning (Gold Category, 2026)
- FutureSkills Prime (NASSCOM) — Certificate Program in Cloud Computing Engineering (Azure / AWS) (Gold Category, 2026)
- DeepLearning.AI — Natural Language Processing in TensorFlow (2025)
- Google Cloud — Introduction to Large Language Models (2025)
- ServiceNow University — System Administration Virtual Internship Program (2026)
- Cisco — CCNA: Introduction to Networks (2026)
- Cisco — CCNA: Switching, Routing & Wireless Essentials (2026)
- Cisco — CCNA: Enterprise Networking, Security & Automation (2026)
