EDUCATION

Bachelor of Technology in Computer Science Engineering- AI&DS 2023-27
Lakshmi Narain College of Technology, Bhopal, India 8.87

Senior Secondary Education 2022
Yogiraj Public School , Kota 81.6%

Secondary Education 2020
Yogiraj Public School , Kota 97%

EXPERIENCE

- Machine Learning Intern – Cognifyz Technologies | Oct–Nov 2025|Developed ML model for restaurant rating prediction.

PROJECTS

AuctionIQ – AI-Powered Cricket Scouting & Decision Intelligence Platform
Java 21 | Spring Boot 3.3 | React 19 | PostgreSQL | JWT | Gemini API
||GITHUB||

- Architected a layered Spring Boot application utilizing Controllers, Services, Repositories, DTOs, and JPA entities following RESTful design principles.
- Implemented stateless authentication using Spring Security 6 with JWT-based authorization, BCrypt password hashing, and request filtering.
- Integrated the Gemini API to generate cricket scouting reports by retrieving player statistics from PostgreSQL and including them in AI prompts.
- Developed a fallback rule-based analysis module that evaluates player statistics locally using predefined rules and regex-based query parsing when the AI service is unavailable.

DeepShield – AI-Powered Deepfake Detection Platform| Python, PyTorch, EfficientNet,OpenCV,Streamlit |LIVE DEMO|GITHUB|.

- Developed an EfficientNet-B4 classifier in PyTorch using transfer learning and class-weighted loss, achieving 95.1% ROC-AUC and 98.6% recall on a dataset of 50,000+ video frames.
- Designed a Convolutional Autoencoder trained exclusively on real faces using MSE and SSIM loss to generate pixel-level anomaly maps for deepfake localization, complemented by Grad-CAM visualizations for explainability.
- Built a preprocessing pipeline using MTCNN for face detection and alignment, and OpenCV for temporal frame sampling, improving model robustness by reducing background noise and redundant frames.
- Developed a web application using Python and Streamlit to enable media uploads, display real-time confidence scores, and present visual forensic heatmaps.

SKILLS

- **Programming Languages**: Java , Python , SQL.
- **Web Development**:Spring Boot, Spring Data JPA, Hibernate, Spring Security (JWT), React, HTML5, CSS3.
- **Core Concepts** : OOPs, DBMS, Operating Systems.
- **Version Control & Database** : Git,GitHub, MySQL,PostgreSQL.
- **Data Science & Machine Learning** : Pandas, NumPy, Matplotlib, Scikit-learn, PyTorch, OpenCV.

ACHIEVEMENTS

- GATE 2026 (DA) – Score: 422, AIR: 5262
- Vice President Corporate Club.
- Best AI/ML Solution award : Hack-to-hire-Ideathon.
- Runner up in LNCT extempore competition & second runner up in LNUniverse debate competition.
- AIR-07 in IESO(International Earth Science Olympiad).
- NTSE Stage 1 Qualified.

CERTIFICATES

- Certificate of completion of Artificial Intelligence by Learning Acmegrade
- Completed Hands on Google Cloud Skills Boost (Google Arcade)
