EDUCATION

- **Lakshmi Narain College of Technology** — Madhya Pradesh, India
  Bachelor of Technology in – Artificial Intelligence and Data Science; GPA: 8.24 — *July 2023 – Present*

- **KVChhatarpur, Madhya Pradesh** — Chhatarpur, MP
  High School; Percentage: 88.6 — *July 2021 – June 2022*

- **KVChhatarpur,MadhyaPradesh** — Chhatarpur, MP
  Secondary School;Percentage: 92.8 — *July 2019 – June 2020*

COURSEWORK/SKILLS

- Data Structures and Algorithms
- Database Management System
- Operating System
- Object Oriented Programming

PROJECTS

AI Resume Parser & Candidate Shortlisting System *(Python,Deep Learning, TensorFlow, Keras,CNN, OpenCV, Flask)*

- Developed an **AI-powered Resume Parser** to extract and analyze candidate information including skills, education, experience, and qualifications from resumes.
- Implemented **NLP-based text preprocessing** including **tokenization, stop-word removal, and text cleaning** to transform unstructured resume data into structured information.
- Applied **TF-IDF Vectorization** to convert resume and job-description text into numerical feature vectors for automated analysis.
- Used **Cosine Similarity** to calculate resume–job description matching scores and measure candidate relevance based on required skills and qualifications.
- Developed a **Flask-based web application** for resume uploading, processing, and displaying ranked candidate results.

Full Stack Expense Tracker *(Java, Spring Boot, React.js, Spring Security, JWT, Spring Data JPA, MySQL, REST APIs, Maven, Git, GitHub)*

- Developed a **Full Stack Expense Tracker web application** with secure user authentication and an intuitive user interface.
- Implemented **CRUD operations** for income, expenses, and categories using **REST APIs**.
- Built the backend using Spring Boot and integrated it seamlessly with a React.js frontend.
- Implemented **JWT-based authentication** and Spring Security to secure user access and protect APIs.
- Used MySQL with Spring Data JPA for efficient data storage and retrieval.
- Followed a **layered architecture** (Controller, Service, Repository) to build a scalable and maintainable application.
- Managed project dependencies using Maven and version control with Git and GitHub.
- Designed and integrated **RESTful APIs** to enable smooth communication between the frontend and backend

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript

Frameworks/Libraries: Spring Boot, React.js, Flask, Scikit-learn, Pandas, NumPy

AI/ML: NLP, TF-IDF, Cosine Similarity, Text Preprocessing

Databases: MySQL, Spring Data JPA

Tools: Git, GitHub, Maven, VS Code, IntelliJ IDEA

Soft Skills: Leadership, Event Management, Writing, Public Speaking, Time Management

CODING PROFILE

Solved 200+ questions of DSA on different Platforms — LINK (🔗)
