PRINCE CHOUHAN

Phone: +91 7067869369 **Email:** princechouhan1708@gmail.com
Linkedin: princechouhan1 **GitHub**: prince-chouhan **Codolio:** princechouhan

SKILLS

Programming Languages: Java, C++
Backend: Spring Boot, Spring Security, JPA, REST APIs, JWT Authentication, External API Integration, Maven
Frontend: HTML, CSS
Databases: MySQL, MongoDB, Redis
Testing: JUnit, Mockito
Tools & Platforms: Git, Postman, Vercel, Render
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

EDUCATION

Bachelor of Technology (Computer Science and Engineering) 2023-2027
Lakshmi Narain College of Technology, Bhopal M.P. CGPA: 8.45

Higher Secondary Education 2021-2022
The Genius Public Higher Secondary School, Niwali M.P. 85.4%

Secondary Education 2019-2020
The Genius Public Higher Secondary School, Niwali M.P. 89.0%

PROJECTS

URL Shortener Application | GitHub

Tech Stack: Java, Spring Boot, Spring Security, JWT, Redis, MongoDB, REST APIs

- Developed a **scalable URL shortening service** supporting short URL generation, redirection, and link management through RESTful APIs.
- Implemented **secure authentication and authorization using Spring Security and JWT**, enabling user-specific URL management.
- Integrated **Redis caching** for frequently accessed URL mappings, reducing database lookups and improving redirection latency.
- Designed a **MongoDB data model** for efficient storage and retrieval of original URLs, short codes, creation timestamps, and associated metadata.

Secure Journal Application | GitHub

Tech Stack: Java, Spring Boot, Spring Security, JWT, Redis, MongoDB, Spring Cron, ElevenLabs API

- Developed a secure journaling platform with **authentication**, **authorization**, and journal management and AI-powered features.
- Designed and implemented **RESTful APIs** for journal creation, retrieval, update, and deletion with **MongoDB** for efficient data management.
- Reduced API response time by **60% (400 ms → 150 ms)** through **Redis** caching, lowering third-party API costs.
- Automated weekly sentiment analysis and AI-powered text-to-speech generation using **Spring Cron** and the **ElevenLabs API**.

Award & Achievements

Smart Pickup – AI-Based Pickup & Alert System
STATATHON 2025 | Winner
Tech Stack: Python, OpenCV, OpenALPR, Node.js, MySQL, HTML, CSS, JavaScript.

- Developed **Smart Pickup**, an AI-powered automated student pickup system to prevent unauthorized handovers and streamline school dismissal.
- Implemented **Licence Plate Recognition (LPR) using OpenALPR** and **facial recognition using OpenCV** to verify authorized guardians in real time.
- Built backend services for **student–guardian mapping, pickup tracking, and automated alerts**, improving the efficiency and security of the pickup process.

CERTIFICATIONS

- **Data Structures & Backend with Java** – Coursera
- **English with IT 2** – Cisco Networking Academy

CODING ACHIEVEMENTS

- Solved 700+ algorithmic problems across LeetCode (Rating – 1900+), Codeforces (Rating 1100+) and GFG etc.
- Practiced core topics including arrays, strings, recursion, trees, tries, graphs, greedy algorithms, and dynamic programming.
