OBJECTIVE

Third-year B.Tech CSE (AI DS) student passionate about backend development and software engineering. Currently developing real-world applications, including a Journal App and Fitness Tracking App, while continuously improving problem-solving skills through daily DSA practice. Seeking an internship or entry-level Software Developer role to apply my knowledge, contribute to impactful projects, and grow as a software engineer.

EDUCATION

Lakshmi Narain College Of Technology **Aug 2023 – Present**
BTech in Computer Science Engineering (AI and Data Science)- ***CGPA - 7.84*** *Madhya Pradesh, India*

Govt. Higher Secondary School, Jeen, Betul **2023**
Class XII (MP Board) - Percentage: ***71%*** *Madhya Pradesh, India*

Govt. Higher Secondary School, Jeen, Betul **2021**
Class X (MP Board) - Percentage: ***79%*** *Madhya Pradesh, India*

SKILLS

Technical Skills
Languages: Java, SQL
Frameworks: Spring Boot, Spring Security
Databases: MySQL, MongoDB
Microservices: REST APIs, WebClient, RabbitMQ, Eureka Server
Tools: Git, GitHub, Maven, Docker, Postman, IntelliJ IDEA
Core Concepts: Data Structures & Algorithms, OOP, Operating Systems
AI Integration: Gemini API

Soft Skills
Problem Solving • Teamwork • Time Management • Communication • Decision Making • Consistency • Self-Learning

PROJECTS

Fitness Tracking System | Java, Spring Boot, Microservices, MySQL, MongoDB, RabbitMQ, Eureka, WebClient, Gemini API **2026**

- Designed and developed a microservices-based Fitness Tracking System using Spring Boot.
- Built User Service (MySQL) and Activity Service (MongoDB) using the database-per-service architecture.
- Developed an AI Service integrated with the Gemini API to provide AI-powered fitness insights and recommendations.
- Implemented synchronous communication using WebClient and asynchronous messaging using RabbitMQ.
- Configured Eureka Server for service discovery and used Docker to run RabbitMQ in a containerized environment.

Journal App | Java, Spring Boot, MongoDB, Spring Security, REST API **2026**

- Developed a secure backend application for creating, updating, and managing personal journal entries.
- Implemented JWT-based authentication and role-based authorization using Spring Security.
- Designed RESTful APIs and integrated MongoDB for efficient data storage and retrieval.
- Used Maven for dependency management and Git for version control.

ACHIEVEMENTS

- Earned the **200 Days** LeetCode badges for consistent problem-solving.

CERTIFICATIONS

Data Structures and Algorithms using Java – Infosys Springboard *Nov 2025*

Java and Data Structures & Algorithms Bootcamp – Sheriyans Coding School *Oct 2025*
