Education

Lakshmi Narain College of Technology — Bhopal, MP
Bachelor of Technology in Computer Science (IoT Specialization); CGPA: 7.48 — *2023 – 2027*

Vindhyachal Academy — Dewas, MP
12th CBSE; Percentage: 84.2% — *2023*

Vindhyachal Academy — Dewas, MP
10th CBSE; Percentage: 93.8% — *2021*

Technical Skills

Languages: Java, SQL, HTML
Frameworks & Tools: Spring Boot, REST APIs, Jackson, Jsoup, Git, GitHub
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Data Deserialization, Stateless Architecture
Relevant Coursework: Database Management Systems (DBMS), Operating Systems

Projects

EduDesk - Automated Student Academic Dashboard | *Java, Spring Boot, REST API, Jsoup*

- Designed and built a stateless, secure web application that eliminates 100% of local credential storage by programmatically scraping real-time academic records from the college ERP.
- Implemented a high-performance Java Spring Boot backend utilizing Jsoup to manage 3-step authentication flows, parse stateful tokens, and maintain session tracking cookies.
- Optimized application performance by shifting from multi-step page loads to a centralized JSON API layer, ensuring instant real-time data synchronization with zero database latency.
- Engineered a predictive analytics module to forecast attendance trajectories and evaluate critical 60%/75% thresholds, reducing manual assessment time by over 80% and delivering actionable academic insights.

QwApp - MCQ Practice & Quiz Platform | *Java, Spring Boot, REST API, Jackson*

- Developed a lightweight REST API using Spring Boot to serve and evaluate a 500+ multiple-choice question bank for certification exam preparation.
- Implemented an in-memory data loading strategy utilizing the Jackson ObjectMapper lifecycle to parse and cache a 180KB unstructured JSON dataset instantly at application startup.
- Designed structured Java POJOs with custom JSON deserialization handlers to normalize multi-format question data into uniform collections with complete accuracy.
- Formatted decoupled REST endpoints for random question fetching, answer verification, and full-set submission grading.

Certifications & Achievements

ServiceNow Certified Application Developer (CAD): Achieved professional-level developer certification for enterprise platform application design.
ServiceNow Certified System Administrator (CSA): Certified in core configuration, implementation, and maintenance of ServiceNow systems.
Programming using Java - Springboard: Certified in object-oriented programming, data structures, and foundational Java software development.
