Professional Summary

Computer Science undergraduate with an 8.43 CGPA and 600+ LeetCode problems solved. Experienced in building full-stack web applications using React.js, Node.js, Express.js, and MongoDB, with strong fundamentals in Data Structures & Algorithms, OOP, DBMS, and RESTful API development. Seeking software engineering opportunities to build scalable and efficient applications.

Education

Lakshmi Narain College of Technology, Bhopal 2023–2027
B.Tech in Computer Science Engineering *CGPA: 8.43/10 — XII: 91.6% — X: 94.6%*

Technical Skills

Languages: Java, C++
Backend: Node.js, Express.js, REST APIs
Frontend: React.js, HTML5, CSS3
Databases: MongoDB
Developer Tools: Git, GitHub, VS Code
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating System
Professional Skills: Problem Solving, Analytical Thinking, Technical Communication, Team Collaboration, Adaptability

Projects

DemoGPT – *AI Chat Application* React, Node.js, Express.js, MongoDB, JWT GitHub Live
- Implemented JWT authentication with registration, login, and token verification, securing six protected API routes.
- Designed MongoDB conversation and message schemas to support persistent multi-thread AI chats while preventing cross-thread data access.
- Integrated an external LLM API through asynchronous Express services, delivering AI responses in approximately 1–3 seconds.
- Optimized message retrieval using a compound MongoDB index on `(userId, threadId)`, reducing query time.

Tradex – *Stock Trading Dashboard* React, Node.js, Express.js, MongoDB GitHub
- Built a scalable dashboard using 15+ reusable React components for portfolio, watchlist, and simulated trading modules.
- Developed eight RESTful APIs for portfolio management, order placement, transaction history, and user account operations.
- Designed four MongoDB schemas with optimized projections to reduce unnecessary data transfer and improve response time.
- Organized the Express backend into route, controller, and model layers for better maintainability and scalability.

Spotify Clone – *Audio Player* JavaScript, HTML5, CSS3
- Developed an event-driven music player supporting play, pause, seek, skip, volume control, and playlist management for 20 tracks.
- Separated playback logic, playlist management, and UI rendering into modular JavaScript components.

Internship & Training

ServiceNow Virtual Internship Program Apr 2026
SmartBridge
- Configured Incident, Problem, and Change Management modules with SLA policies and priority-based workflows.
- Automated service request routing using ServiceNow Flow Designer, enabling condition-based assignment and approval workflows.

Achievements

- Solved 600+ Data Structures and Algorithms problems on LeetCode.
- Gold Certification in NASSCOM IoT & Digital Transformation.
- Selected for the Amazon ML Summer School 2026 (Currently Enrolled), a competitive program focused on Machine Learning and Artificial Intelligence fundamentals.

Certifications

- Google Cloud Computing Foundations — NPTEL
- Generative AI Productivity Skills — Microsoft & LinkedIn
