SUMMARY

Motivated Computer Science undergraduate (B.Tech, 2023–2027) at Lakshmi Narain College of Technology, Bhopal. Proficient in **Java, Spring Boot, REST APIs, MySQL, JPA/Hibernate**. Foundation in Data Structures, Algorithms, Object-Oriented Programming, and backend development. Eager to apply problem-solving skills, adaptability, and technical expertise in software development roles.

EDUCATION

Lakshmi Narain College of Technology **2023 – 2027**
B.Tech – Computer Science and Engineering, CGPA: 8.13 *Bhopal, Madhya Pradesh*

Dr. Radhakrishnan Memorial **2021 – 2022**
Higher Secondary – Science Stream (PCM), Percentage: 93.4% *Raisen, Madhya Pradesh*

St. Francis Convent Hr. Sec. School **2019 – 2020**
High School Certificate, Percentage: 85% *Raisen, Madhya Pradesh*

TECHNICAL SKILLS

Languages: Java, SQL

Technologies/Frameworks: Spring Boot, Spring Security, Hibernate, JPA, REST APIs

Database Management: MySQL, ER Modelling

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ

Core Subjects: OOP, Data Structures & Algorithms, DBMS, Operating System

PROJECTS

JobHub – Full Stack Job Portal

Spring Boot, Spring Security, JWT, MySQL, JPA/Hibernate, React, Tailwind CSS

- Developed a scalable backend for a **Job Portal** using **Spring Boot, Spring Security, JWT Authentication, JPA/Hibernate, and MySQL**, supporting secure recruiter and job seeker workflows.
- Designed and implemented RESTful APIs for **authentication, profile management, companies, job postings, job applications, skills, education, experience, projects, and certifications**, following a layered architecture (Controller–Service–Repository).
- Implemented **role-based authorization**, DTO mapping, validation, centralized exception handling, and secure file upload for resumes and certificates.
- Integrated backend APIs with a React-based frontend to deliver a complete end-to-end recruitment platform.
- Tested and documented APIs using **Postman** and managed the project using **Git**.

SmartKheti – Crop Recommendation System

- Developed a web-based crop recommendation system that suggests optimal crops based on soil nutrients (NPK), temperature, humidity, and rainfall.
- Built an interactive frontend using **React, Vite, and TypeScript** with a step-by-step user input interface.
- Integrated prediction logic to process user inputs and generate crop recommendations for improved agricultural decision-making.
- Designed a user-friendly UI to simplify complex agricultural data into actionable insights for farmers.

CERTIFICATIONS / EXTRACURRICULAR

- Infosys Certification – Introduction to Cloud Computing
- Solved 210+ coding problems on LeetCode, focusing on Java and Data Structures
- Led a college project team, overseeing planning, development, and delivery

SOFT SKILLS

- Strong adaptability and eagerness to learn new technologies, ensuring continuous growth aligned with organizational goals.
- Effective communication and teamwork skills, fostering smooth collaboration in cross-functional projects.
