Career Objective

Self-motivated engineering undergraduate with strong foundations in Java, Object Oriented Programming, Data Structures & Algorithms, and problem-solving. Seeking a software engineering opportunity to apply my technical skills, contribute to real-world projects, and enhance my development skills in a collaborative environment.

Education

Lakshmi Narain College of Technology, Bhopal, India **August 2023 - June 2027**
B.Tech - Artificial Intelligence & Data Science, **CGPA:** 8.09

Raj Narain College, Hajipur, Bihar **April 2020 - April 2022**
12th-BSEB, **Percentage**: 86.8%

Guru Vashishtha Vidyayan School, Hajipur, Bihar **April 2019 - July 2020**
10th-CBSE, **Percentage**: 87.8%

Coursework Taken

Computer Science Courses:
OOP, Operating System, Data Structures & Algorithms, DBMS

Data Science Course:
Machine Learning

Technical Skills

Programming Languages: Core Java
Front-end Technologies: HTML, CSS, JavaScript, React (Basics)
Database: MySQL
Back-end Technologies: Spring, Spring Boot (Basics)
Software Design: SOLID Principles
Tools: IntelliJ IDEA, VS Code, Google Colab

Projects

Pneumonia Detection using Deep Learning

- Developed a CNN-based deep learning model to detect pneumonia from chest X-ray images
- Performed image preprocessing, normalization, resizing, and data augmentation to improve model performance
- Implemented model training and evaluation using Python and TensorFlow/Keras
- Achieved 87% accuracy in reliable binary classification for medical imaging tasks
- Enhanced skills in deep learning, image processing, and applied AI

Library Management System

- Built a library management system using OOPs concepts in Java
- Added functionalities such as adding new books, searching books, and registering students
- Implemented check-in and check-out features for efficient book management
- Strengthened understanding of object-oriented programming and basic system design

Sorting Algorithms Visualizer

- Built an interactive web application to animate sorting algorithms (Bubble Sort, Selection Sort, Insertion Sort) in real time
- Engineered step-by-step visual feedback for comparisons and swaps using vanilla JavaScript and DOM manipulation
- Displayed time and space complexity for each algorithm to reinforce conceptual understanding
- Integrated controls for adjusting array size and animation speed, enhancing user experience

Certificates & Achievements

- NPTEL Algorithmic Graph Theory and Data Structures – Received Elite + Silver Appreciation (IIT Kharagpur, 2026)
- NPTEL Programming in Java (IIT Kharagpur, 2025)
- Oracle Java Foundations (Coursera & Oracle, 2025)
- Achieved Global Rank 2393 in CodeChef Starters 237
- Solved 400+ problems across multiple coding platforms

Coding Profiles: LeetCode, GeeksforGeeks, HackerRank, CodeChef

Field of Interest / Hobbies

Learning new concepts, problem-solving, and listening to ghazals and songs during leisure time
