ASHUTOSH MISHRA

Python Developer | App & Web Developer

mishrashu777@gmail.com | | LinkedIn | GitHub | Portfolio

SUMMARY

B.Tech Computer Science Pre -Final year student with hands-on Python experience in data processing, REST APIs, and applied machine learning. Built a FastAPI screening pipeline combining statistical outlier detection and drift prediction, plus a Streamlit dashboard for water-quality risk analysis. Comfortable with Pandas, NumPy, scikit-learn, debugging, JSON, and Git; interested in practical AI and automation workflows.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Kotlin, SQL
Python & Data: Pandas, NumPy, FastAPI, Pydantic, REST APIs, JSON, CSV processing, data cleaning
AI/ML: model integration
Tools & Practices: Git, GitHub, Jupyter Notebook, VS Code, SQLite, debugging, testing, documentation
Web & Mobile: React, React Native, Node.js, Jetpack Compose

EXPERIENCE

App Development Intern — Atavishaala | 20 Aug 2026 – Present

- Develop and maintain React Native application features using TypeScript and PNPM, following the existing codebase and component patterns.
- Implement UI features from Figma designs and contribute to API integration, validation, navigation, and Git-based review/deployment workflows.
- Contributed to a shipped project and continue feature development for the Farm Market application.

Python Development Intern — Cognifyz Technologies | Dec 2025 – Jan 2026

- Completed structured Python tasks across two project levels covering programming logic, data structures, and problem solving.
- Used modular programming, debugging, and clean-code practices; maintained completed work in Git and incorporated mentor feedback.

PROJECTS

DriftGuard — AI-Driven Component Burn-In Screening | Tech Stack *: Python, FastAPI, Pandas NumPy, scikit-learn, React, REST API*
Live demo: *driftguard.app*, | **Repository:** https://github.com/ashu-mishra06/Driftguard

- Built FastAPI endpoints to accept component measurement CSVs and return structured JSON screening verdicts.
- Integrated statistical outlier detection (median/MAD z-score) and a scikit-learn drift-prediction model into a screening pipeline.
- Connected the API to a React + Vite dashboard and resolved CORS and verdict-consistency issues across dashboard views.

Neel-Tarang — Water-Quality Risk Analysis Dashboard | Tech Stack *: Python, Streamlit, Pandas, PyYAML, pytest, data analysis*
Live demo: https://neel-tarang.streamlit.app/ | **Repository:** https://github.com/ashu-mishra06/Neel-Tarang
Developed a dashboard that ranks Bhopal immersion ghats using 1,524 water-test readings across seven ghats from 2023–2025.

- Implemented baseline-versus-immersion risk scoring, confidence indicators, report-page evidence links, and a test-planning view.
- Added CSV upload and re-scoring, bilingual Hindi/English briefs, and automated tests for scoring and evidence consistency.

RoadSOS — Offline Crash Emergency Assistant | Tech Stack : *Kotlin, Jetpack Compose, TensorFlow Lite, SQLite, Android*
Repository https://github.com/ashu-mishra06/RoadSOS | ***Native Android prototype***; no browser-based live demo

- Built an offline-first Android prototype that monitors crash-like audio, starts a false-alarm countdown, and supports SOS actions with location fallback.
- Implemented local emergency-service lookup using SQLite and integrated app screens, foreground services, DataStore, and emergency history.

ACHIEVEMENTS

- Future Yi 6.0 National Round — 1st Runner-Up (2026), Team Secretos; led the RoadSOS road-safety solution as Team Leader.
- Future Yi 6.0 Bhopal Chapter — 1st Place in the Yi Road Safety category (24 Aug 2026) , led as Team Leader.
- Smart India Hackathon 2026 — contributed to DriftGuard (Problem Statement 26170), lead the team as the Team lead

EDUCATION

B.Tech, Computer Science Engineering — LNCT Group of Colleges | 2024–2028 | CGPA: 8.10

CERTIFICATIONS

Oracle Certified Foundations Associate (Oct 2025) | Python — OneRoadmap (Oct 2025) | Data Structure Bootcamp — GeeksforGeeks (Nov 2025)
