JAY GAUTAM

jayg67419@gmail.com | +91-89625-21804 | github.com/jay-gautam-18 | linkedin.com/in/jay-gautam-zy-ai

Summary

B.Tech (CSE) student graduating 2027 with hands-on full-stack experience (SpringBoot , MERN, WebSockets, Docker) across four shipped and demoed projects. Comfortable working independently from concept through containerized deployment. Actively building fundamentals in data structures and algorithms (200+ LeetCode problems solved) alongside applied work integrating third-party AI/ML models into production-facing features.

Experience

Web Developer | VMS Chemicals Aug 2025 – Apr 2026

- Designed and deployed a custom website for VMS Chemicals from the ground up, translating business requirements into a user-friendly digital interface. vmschemicals.com

Education

Lakshmi Narain College of Technology, Bhopal 2023 – 2027
B.Tech in Computer Science Engineering (IoT & Cyber Security) *CGPA: 7.34/10*
St. Monfort Sr. Sec. School, Bhopal –2022
Class XII - PCM + English + PE
St. Monfort Sr. Sec. School, Bhopal –2020
Class X

Technical Skills

Languages & Fundamentals: Java, JavaScript, TypeScript, OOP Principles, Data Structures & Algorithms
Frontend: React.js, Tailwind CSS, GSAP
Backend & Architecture: Node.js, Express.js, Spring Boot, WebSockets, WebRTC, REST APIs
DevOps & Data: Git, Command-line tools, Docker, MongoDB Atlas, SQL, Redis
Security & Version Control: JWT , Google OAuth , GitHub , Vercel , Render

Soft Skills

Technical Leadership, Rapid Adaptability, Problem Solving, Analytical Thinking

Projects

CodeSync | React, Yjs, WebSockets, SpringBoot GitHub

- Implemented conflict-free multi-user editing using Yjs (CRDTs) to seamlessly merge concurrent edits peer-to-peer without relying on a central arbitrating server.
- Synchronized cursor state and live presence across clients over WebSockets, implementing custom reconnect and resynchronization logic to guarantee zero edit data loss during network drops.

Satyavak – AI Legal-Aid Platform | Node.js, Express GitHub

- Integrated a fine-tuned BERT model for legal document classification and utilized a custom YOLO architecture to flag prohibited or sensitive content within uploaded evidence.
- Built the retrieval and prompt-construction layer feeding the core legal chatbot, implementing semantic guardrails to drastically reduce hallucinated legal citations.

AI Interviewer GitHub

- Built a real-time video interaction interface and designed an LLM pipeline(Gemini api) to generate immediate, structured feedback regarding response clarity, content accuracy, and presentation delivery.
- Engineered the core prompt/response pipeline to dynamically transform raw text transcripts into cleanly scored, structured analytical feedback instead of free-form text blocks.

Achievements

- Solved **200+ Data Structures and Algorithms problems** on LeetCode, covering arrays, graphs, dynamic programming, and trees.
- **2nd Position**, College Web Dev Competition (competing against 50+ teams).
- **Qualified State Round**, Skill India Hackathon.
- **Round 2 Winner**, Reimagine Hackathon.
