Parag Tiwari

Bhopal, India | +91 7489833453| paragt2005@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

PROFESSIONAL SUMMARY

Computer Science undergraduate focused on Machine Learning and Generative AI, experienced in developing intelligent systems and practical AI solutions. Strong foundation in machine learning, deep learning, and AI engineering, with a focus on building deployable ML applications.

EDUCATION

BANSAL GROUP OF INSTITUTIONS Bhopal, MP

Bachelor of Technology, Major in Computer Science; CGPA: 8.06/10; SGPA: 8.43 ; Aug 2023 – Present

TECHNICAL SKILLS

Languages: Python, C++, SQL
Machine Learning: Scikit-learn, NumPy, Pandas, Pytorch, Model Evaluation, Hyperparameter Tuning
Software & GenAI: FastAPI, REST APIs, React, Next.js, HTML, CSS, PostgreSQL, LangChain, LangGraph, RAG
Technologies & Platforms: CI/CD, Docker, Databricks, Mlflow, Vercel, Data Structures and Algorithms

WORK EXPERIENCE

Harvard Aspire Institute | Aspire Program Fellow Remote | Feb'2026 – Present

- **Completed** a 3-month **leadership** development program focused on problem-solving, communication, strategic thinking, and social impact through structured learning, workshops, and collaborative projects.
- **Awarded $500 in project funding** to develop **RecycleX**, a **digital marketplace** connecting households, collection partners, and recycling companies, and currently **leading** its product development and execution.

SureProEd (SURE TRUST)| Full Stack Intern Remote | July 2025 – April 2026

- **Developed** hands-on expertise in full-stack engineering by working across **frontend**, **backend**, **APIs**, authentication, and database workflows on production-oriented web applications.
- **Worked** on an **AI-powered course generation platform**, gaining practical experience in LLM application development, API integration, responsive UI development, and modern web architecture.

PROJECTS

END-TO-END ML PROJECT | MLOps| Live |GitHub Mar'26

Tech Stack: Python, Scikit-learn, MLflow, DVC, Docker, FastAPI, AWS

- **Developed** an **end-to-end** machine learning pipeline covering data preprocessing, model training, evaluation, experiment tracking, and **reproducible** ML workflows.
- **Deployed** the trained model as a **production-ready** API and implemented MLOps practices for versioning, monitoring, and **scalable** model deployment.

CARE GRID|Tech Lead|EY Techathon 6.0 Pre-Finalist| Live | GitHub Dec'25 – Jan'26

Tech Stack: Python, LangGraph, FastAPI, React, PostgreSQL, Google Maps API, NPI Registry, Vercel

- **Designed** a LangGraph-based **multi-agent** AI platform to automate provider validation, enrichment, and risk assessment for healthcare payers, and improved audit readiness by **~40%** using scalable agent workflow.
- **Implemented** agent **orchestration** integrating Google Maps API and NPI Registry, **reducing manual verification by ~60%** & **achieving 90%+ provider data accuracy** through automated verification and confidence scoring.

CERTIFICATIONS & PROGRAMS

- **Machine Learning Specialization - Stanford University & DeepLearning.AI** In Progress
- **Oracle — OCI Agentic AI Foundations Associate Learning Path** Jul '26
- **McKinsey.org Forward Program — Professional Development Program** Oct '25 – Jan '26
- **Object Oriented Programming IIT Ropar, NPTEL** Jan '25
