PUSHPAK JANGELA

Senior Software Engineer — Frontend | React | Frontend Architecture

+91 8085390816 jangelapushpak2020@gmail.com LinkedIn GitHub Portfolio

PROFESSIONAL SUMMARY

Senior Software Engineer with **2.7+ years of experience** building scalable React applications and high-performance enterprise frontends. Experienced in **frontend architecture, micro-frontends, performance optimization, reusable component systems, and data-intensive UI**, with applications supporting **200,000+ users**. Modernized a large frontend through modular architecture, reducing initial load time from **60 seconds to 2 seconds**.

PROFESSIONAL EXPERIENCE

KFin Technologies, Hyderabad, India: Senior Software Engineer June 2025 – Present

- **Architected** a shell-based **micro-frontend architecture using Module Federation**, decomposing a large enterprise frontend into **5+ independently deployable modules** and enabling parallel development across teams.
- **Modernized** a large application containing **5+ business modules**, reducing initial load time from **60 seconds to 2 seconds** through modularization, code splitting, lazy loading, selective module loading, and optimized rendering.
- **Enabled** independent module releases and failure isolation, allowing teams to develop, deploy, and troubleshoot modules without coupling the complete application.
- **Delivered** large-scale financial workflows supporting **200,000+ users and 24+ AMCs**, covering onboarding, KYC, investor, transaction, reconciliation, monitoring, and administrative workflows.
- **Built and enhanced 35+ production-grade reusable components** using **React, TypeScript, MUI, and Tailwind CSS**, following modular structures for component logic, styling, props, and exports.
- **Implemented** frontend delivery using **Docker, Jenkins, AWS ECR, S3, CloudFront, and Nginx**, collaborating with **5+ business, backend, QA, and DevOps teams**.

KFin Technologies, Hyderabad, India: Software Engineer February 2024 – June 2025

- **Built** AMC and Investor onboarding workflows using **React and TypeScript**, supporting multi-step forms, bulk data processing, conditional workflows, and validation with **Formik and Zod**.
- **Engineered** data-intensive dashboards using **MUI DataGrid, charts, virtualization, pagination, and optimized state updates** for high-volume transaction, application, and operational data.
- **Developed** monitoring and request-analysis interfaces covering **user activity, transaction status, application health, database status, logs, request latency, and failure points** to support production issue investigation.
- **Implemented authentication, permission, and role-based guards**, user inactivity handling, and admin workflows across enterprise applications.

PROJECTS

- **Reusable UI Component Library:** Built a reusable library of **45+ components** using **React, TypeScript, MUI, and Tailwind CSS**, focusing on consistent UI patterns, modular design, and maintainability.
- **Configurable Frontend Package:** Designed and published an **npm package** supporting flexible integration with multiple state-management approaches, including **Redux, Context, and Zustand**.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Module Federation, Tailwind CSS, MUI, Formik, Zod
Architecture: Micro-Frontend Architecture, Frontend Architecture, Performance Optimization, Code Splitting, Lazy Loading, Virtualization, Component Architecture, State Management, Authentication & Authorization
Cloud & Tools: Docker, Jenkins, AWS ECR, AWS S3, CloudFront, Nginx, Git, CI/CD, Browser DevTools
Backend & Database: Java, Spring Boot, Node.js, SQL, MySQL

EDUCATION

Bachelor of Technology in Computer Science Engineering **Graduated: 2020 – 2024**
Lakshmi Narain College of Technology of Excellence **CGPA: 8.52**

ACHIEVEMENTS

Solved **500+** DSA problems. Certified in **Micro-Frontend Architecture**.
