Projects

ERP for Textile, *Enterprise Web Application for Textile Printing Operations* 07/2026 – 08/2026
Designed a web-based Textile Printing ERP to streamline end-to-end textile production and operational workflows, from order management and cloth receiving to printing, processing, finishing, packing, dispatch, and billing. Focused on creating a consistent, user-friendly enterprise interface with clear data management, workflow tracking, forms, tables, dashboards, and reporting features.

MSME Business, *Business Efficiency and Accessibility for MSMEs* 05/2024 – 06/2024
MSMEs are businesses classified by size, usually based. Created structured information architecture and responsive UI to improve accessibility for small businesses.

GNS Finance, *Client: Motilal Oswal, Trust in Financial Services* 03/2024 – 05/2024
Designed a finance website offering services like life insurance, loans, and investment guidance. Designed a user-friendly finance platform to build trust and simplify navigation across devices.

Freelance Work

E commerce website, *Everything You Need, All in One Place* 12/2025 – 03/2026
Designed a modern and user-centric e-commerce website that provides a seamless online shopping experience. The platform enables users to browse products, search by categories, view detailed product information, add items to the cart.

Cab Booking, *User-Friendly Cab Booking Solutions* 10/2025 – 12/2025
Designed user flows and booking journeys to simplify ride discovery and reduce booking steps. Focused on usability, quick navigation, and intuitive mobile interactions.

Doctor appointment, *Designed a user-friendly Doctor Appointment* 09/2025 – 10/2025
Designed a user-friendly Doctor Appointment mobile application focused on making healthcare access simple and efficient. The app allows users to search for doctors, view profiles, book appointments, manage schedules, and receive appointment reminders. The design process included user research, user flows.
