Profile

B.Tech Computer Science Engineering Student with strong fundamentals in Data Structures and Algorithms, having solved 200+ problems. Hands-on experience in full-stack development using React, Node.js, and modern web technologies. Skilled in problem-solving and building efficient, scalable applications, with a keen interest in developing high-quality software and continuously improving technical expertise.

Education

Lakshmi Narain College of Technology — Bhopal, India
B.Tech, CSE – IoT & Cyber Security incl. Blockchain; CGPA: 8.45 — *2023 – 2027*

Saket MGM Sr. Sec. School — Vidisha, India
Higher Secondary School (12th), CBSE; Score: 85.6% — *2022*

Saket MGM Sr. Sec. School — Vidisha, India
Secondary School (10th), CBSE; Score: 84% — *2020*

Skills

Programming Languages: Java

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MySQL

Core Concepts: Data Structures and Algorithms, Object Oriented Programming, Computer Networks

Tools: Git/GitHub, Postman

Additional Skills: Graphic Designing, Internet of Things (IoT)

Projects

Gen-AI Interview & Resume Preparation Platform Live

A full-stack AI-powered interview preparation platform that generates domain-specific interview questions and builds personalized resumes. Integrated Generative AI APIs to dynamically produce interview questions and explanations, with RESTful backend services built using Node.js and Express.js to handle AI prompt processing and structured JSON responses. The frontend was built with React.js, using MongoDB for the database and Postman for API testing.

Scatch – Premium Bags Estore Live

A modern premium bag e-commerce platform built using the MERN stack (Node.js, Express.js, MongoDB) with a clean, responsive Tailwind CSS frontend. Implemented secure user authentication and a dynamic shop and cart system, with backend APIs tested using Postman to ensure reliable and smooth client-server communication.

Eco – Breathe (SIH 2025) – Solar-Powered, Decentralized Smart Air Monitoring & Purification System Live

- Collaborated in SIH 2025 to design the final prototype of the purification system, contributing to hardware architecture, aesthetics, airflow design, marketing, business model, and branding
- Built a real-time IoT AQI device for hyper-local air quality monitoring
- Developed a landing page and full-stack AQI dashboard using React, Node.js, and Firebase, visualizing real-time data for 5+ pollutants
- Engineered REST APIs and a responsive UI enabling low-latency data processing and improved user experience

Awards and Certifications

Smart India Hackathon 2025 Grand Finale – Runner-Up

Solve Expo by JNCT – 3rd Prize Winner

NPTEL Java with DSA Certification (IIT Kharagpur) – ELITE

Cisco – Networking Basics

Cisco – English For IT 2
