EDUCATIONS

LNCT Bhopal | Bhopal, India — Aug 2023
Bachelor of Technology in Computer Science and Engineering — *CGPA : 8.75*

PROJECTS

Health Rush | Github — Oct2025 - Feb2026

- **Engineered a smart ambulance dispatch system** using a priority-based algorithm to allocate the nearest ambulance based on emergency severity, distance, and availability, supporting **500+ simulated requests/day**.
- **Integrated GPS and geospatial APIs** for real-time ambulance tracking, route optimization, and **hospital recommendations within 2–3 seconds**.
- **Built a full-stack emergency response platform** with **4+ core modules** (ambulance booking, SOS alerts, symptom-based assistance, and live status tracking).

Technologies / Tools Used:*React.js, Node.js, Express.js, MongoDB, OpenStreetMap API, Redux, JWT*

Credify | Github — May2026 - Jun2026

- Created a full-stack Resume Verification Platform using **Spring Boot, React.js, PostgreSQL, and JWT Authentication**, transforming traditional **PDF/DOC resumes** into interactive digital profiles.
- Combated **fake and unverifiable resumes** by allowing candidates to attach proof for **4+ profile sections** (skills, projects, certifications, and experience), enabling recruiters to independently verify each section.
- Implemented **JWT-based authentication**, **file uploads**, and **role-based access** for **2 user roles**: Candidate and Recruiter.

Technologies / Tools Used: *Spring Boot, Spring Data JPA, React.js, PostgreSQL, JWT Authentication, Maven*

EducationMedia | Github Website — Feb2025 - Apr2025

- **Built a full-stack educational media platform** using **React, Node.js, Express.js, and MongoDB**, implementing **15+ REST APIs** for content sharing, user interactions, and profile management.
- **Implemented secure JWT-based authentication** with encrypted password storage using **bcrypt**, enabling **6+ core features** including login, registration, profile management, follow/unfollow, post creation, and comments.
- **Integrated Socket.IO** to enable **3+ real-time features** including messaging, live notifications, and instant like updates, delivering a responsive user experience.

Technologies / Tools Used:*React.js, Node.js, Express.js, MongoDB, Cloudinary, Multer, Socket.IO*

SKILLS

Databases :	MySQL, MongoDB
Frameworks & Libraries:	React.js, Node.js, Tailwind CSS, Spring Boot, Spring Security, Spring Data JPA
Programming Languages:	Java, C++, JavaScript
Soft Skills:	Teamwork, Problem-solving, Time Management
Tools & Platforms:	Git, GitHub, IntelliJ IDEA, VS Code, Maven, Postman

AWARDS & ACHIEVEMENTS

- **Achieved a global rank of 2156** in Round 1096 (Div. 3) on Codeforces (Pupil, 1224).
- **Attained a global rank of 192** with a rating of 3 (1730) on CodeChef.
- **Ranked in the top 5%** globally as a LeetCode Knight (1916), with a global rank of 1466 in Weekly Contest 488.
- **Solved over 2,000 data structures and algorithms (DSA)** and competitive programming problems across various platforms.
- **Contributed as an Educational Content Writer** for Quora and Shiksha.
- **Participated in over 100 competitive programming contests** across Codeforces, CodeChef, and LeetCode.
- **Engaged in the Smart India Hackathon.**
- Cleared **Flipkart GRID 8.0** Round 1 among nationwide participants.
