QUANTIPHI

Platform Engineer Intern | Internship | Location: India (exact location to be confirmed)
Website: quantiphi.com | Contact: Official company careers portal

Job Description

The Platform Engineer Intern will support the design, development, and maintenance of cloud-based platform infrastructure. The role focuses on automation, deployment workflows, monitoring, and reliable platform services while working with software and DevOps teams.

B. Academic Eligibility Criteria

Criteria	Requirement
Minimum CGPA	Not specified in the available role details; suggested screening benchmark: 6.5/10 or equivalent. Verify with the official hiring notice.
Graduation year	Not specified; confirm the eligible graduating batch in the official hiring notice.
Degree	B.E./B.Tech in Computer Science, Information Technology, or a related engineering discipline (suggested role-aligned profile; verify).
Eligible branches	CSE, IT, or related computing / engineering branches (suggested; verify).
Class 10 & 12	No percentage threshold confirmed; check the official application criteria.
Active backlogs	Not specified; suggested preparation: ensure no active backlogs unless the official notice permits them.

C. Technical Skills Criteria

• Programming fundamentals in Python, Java, Go, or another language.
• Linux / command-line basics and scripting.
• Understanding of cloud concepts, networking, APIs, and distributed systems.
• Familiarity with Docker and containerization; Kubernetes knowledge is an advantage.
• CI/CD concepts and tools such as Git, Jenkins, GitHub Actions, or similar.
• Basic monitoring, logging, troubleshooting, and infrastructure-as-code concepts.
These are role-aligned suggested skills, not confirmed official minimum requirements.

D. Work & Internship Experience Criteria

Prior full-time experience is not expected for an internship. Relevant coursework, personal projects, open-source contributions, lab work, or prior internships involving cloud infrastructure, DevOps, automation, or backend systems are useful. No minimum experience duration is confirmed.

E. Project Criteria

A relevant project could include a Dockerized application with an automated CI/CD pipeline, a cloud deployment, infrastructure provisioning, service monitoring, or a small Kubernetes-based deployment. Be prepared to explain architecture, tools used, deployment steps, failure handling, and your individual contribution. This is a suggested project profile, not a stated mandatory requirement.

Important: This is a preparation-oriented profile. Items marked suggested are inferred from the role and are not official Quantiphi eligibility conditions. Confirm all criteria against the current company job posting.
