PROJECTS

SmartAttend — QR-Based Attendance System
Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, QR Code API

- Built a web app where teachers generate a time-limited QR code for each class and students mark attendance by scanning it.
- Implemented role-based login for teachers and students, with a dashboard showing subject-wise attendance records.

CampusKart — Student Marketplace
Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO, Cloudinary

- Developed a marketplace where students list and buy used books and gadgets, with image uploads and category search.
- Added real-time buyer–seller chat using Socket.IO and a wishlist to save items for later.

FitTrack — Workout & Diet Tracker
Tech Stack: React.js, Chart.js, Node.js, Express.js, MongoDB

- Created a tracker to log workouts, meals and daily water intake, with progress charts for weekly and monthly trends.
- Built REST APIs for user goals and weekly summaries, with secure authentication for each user.
